

We are all in this together.

A cliché but never been so true. A calling we answered as healthcare workers, to care for others. We have never been tested like this way before, physically, mentally and emotionally. But we are not alone. We will rise up together because we are a community of professionals who are dedicated, resilient and committed to win this fight.

**From,
The Officers of NTSGNA**

Here are some links to information about COVID-19 and Continuing Education Hours. Thank you to Boston Scientific, Medtronic and American Cancer Society for providing us the links.
