

## Proud To Be GI

During this very challenging time, I am more proud to be a healthcare worker and **Proud to be GI!** This is what we commit to do everyday, to care for others. We do not stop doing our procedures until we've accomplished our tasks, whether its removing polyps, stopping a bleed, removing food bolus, staging a pancreatic cancer, removing a CBD stone and many more. But, we all can not do this without the support of our loved ones, who make sure everyone is doing well at home so we can do what we do best at work. This is the time to appreciate and celebrate our spouses, partners, family and co-workers for the hard work and sacrifices we do. To all our GI family, thank you and be safe!
