

Happy Nurses Week!

The Lady with the Lamp

Florence Nightingale founder of modern nursing was born May 12, 1820 in Florence Italy. She came from a wealthy family. She did what is unexpected of a young affluent woman in her time. She turned down a marriage proposal from a man with means and pursued nursing despite her parents refusal. She became well known for her compassionate care and for improving sanitation during the Crimean War (1853-1856). She was referred to by the wounded soldiers as "the lady with the lamp" and "the Angel of Crimea".

We are very much like Florence Nightingale in three ways:

- We are brave, we who answered the calling of nursing and service
- Our sanitation process is still and is always key to optimal health
- We are the lamp and the angels who heal and watch over the ones who are not well.

Educational Opportunities

COVID-19 has forever changed our history and the way we practice in healthcare. We greatly miss our interactions with all of you. Because of the uncertainty of how to go about mass gatherings, we ask for your understanding and we apologize that as of now these are the ways we can give you learning opportunities. Thank you to Steris and Medtronic!

Medtronic

Basics of Esophageal Manometry Study Marking
Thursday, May 14, 2020 from 4:00-5:00 pm
Central Daylight Time.

This training is intended for clinical staff that are interested in learning how to mark an esophageal manometry study after performing the procedure.
